

# Follow the Directions and Make Paper Candy Canes

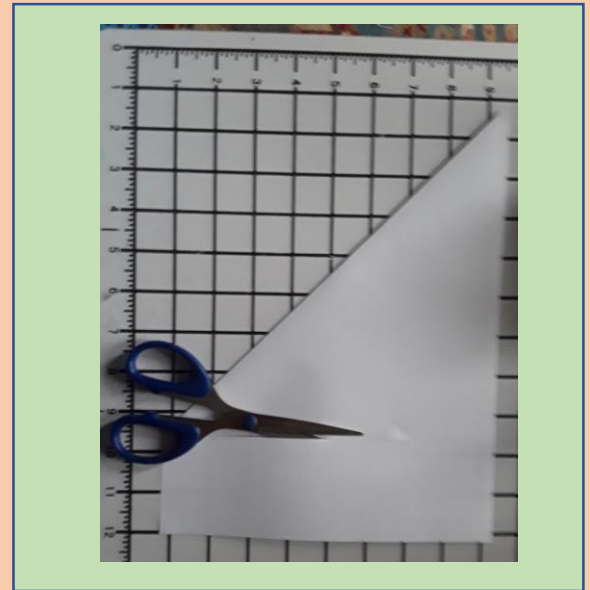

You need a scissors, ruler, markers, tape, and piece of white computer paper.

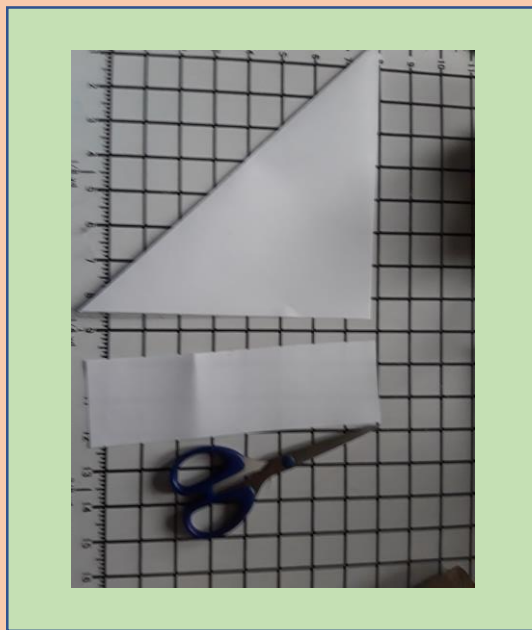

Make a square from the white piece of computer paper.

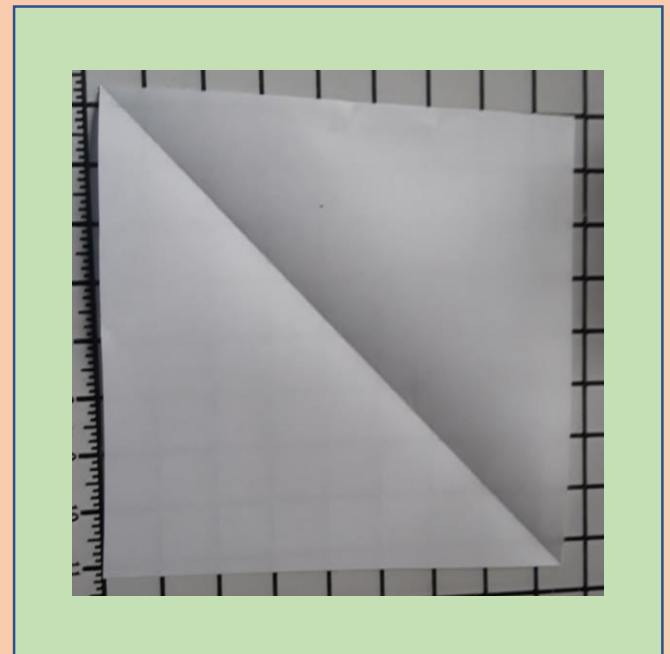

Take an upper corner and fold it down until it meets the right edge

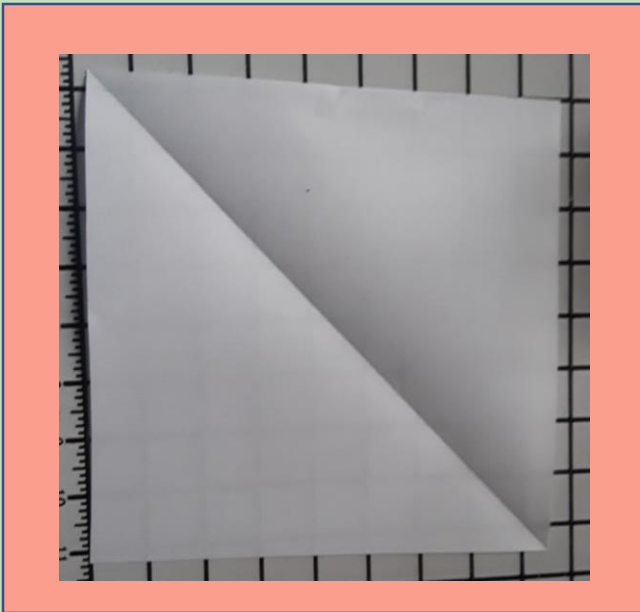

Cut across the lower edge.

It should now look like a triangle.

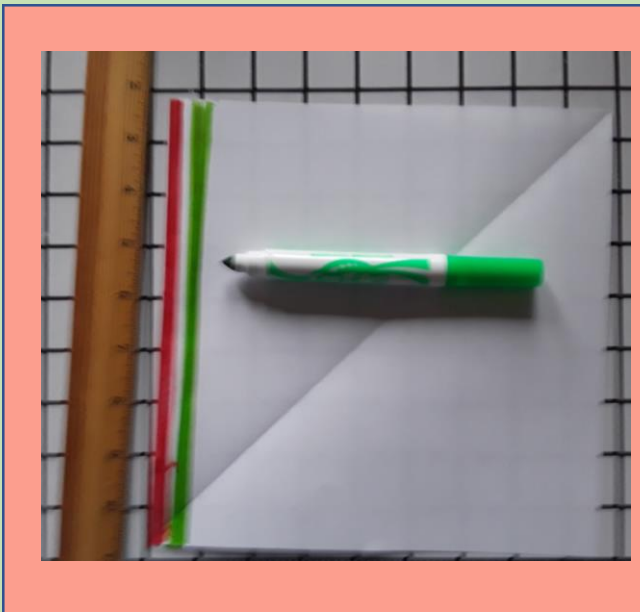

Open it and you have a square.

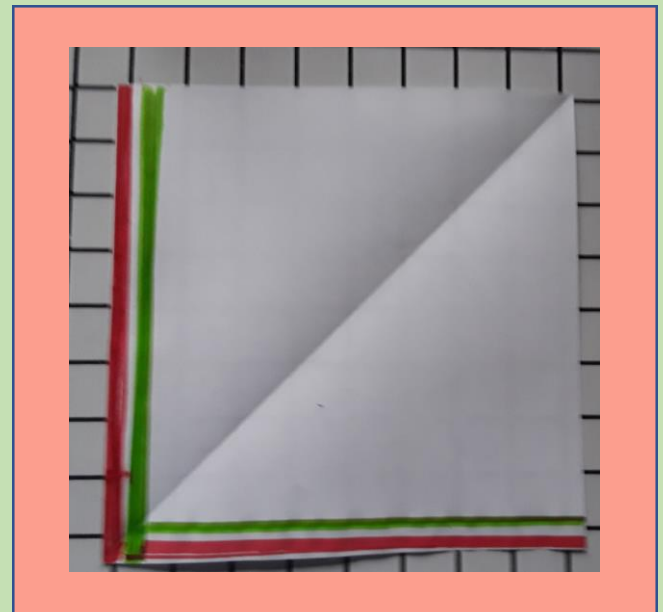

Lay out your white paper square.

Use the ruler to help make straight lines along the edge of one corner.

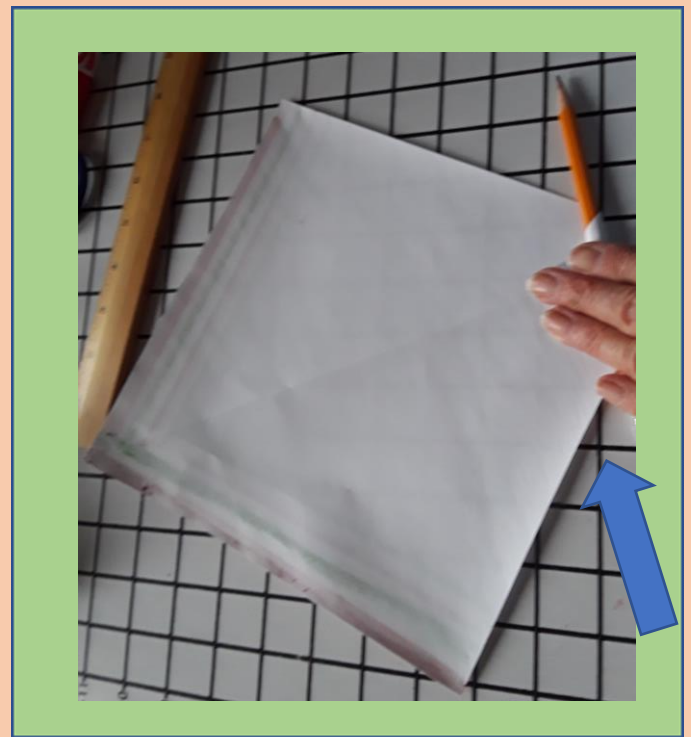

You can use more than one color if you like.

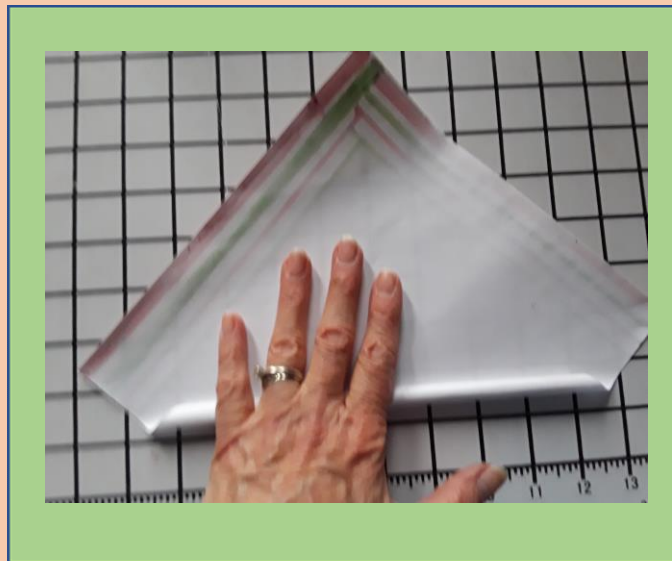

Do the other corner edge.

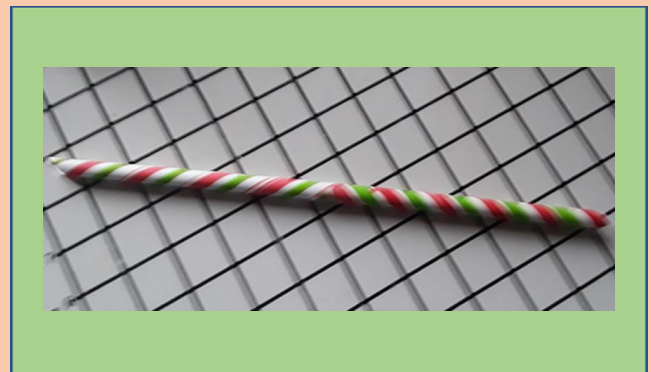

Your square should look something like this. Take the paper and flip it over to the plain white side.

Use a pencil to start rolling on the uncolored corner .

Keep rolling until you see the stripes appearing. Go all the way to the corner and it looks like a tube with stripes.

Use the tape to keep it from unrolling. Flatten and curl one end so it looks like a cane. Now you can use it for decoration.
