

# How to make a One Cut Book

Print out a copy of the template to add your own pictures or story. The dashes indicate fold lines. The red line indicates a single cut line. The numbers indicate the bottom of the pages. This is important to note so you do not have pictures or writing upside down in your completed book.

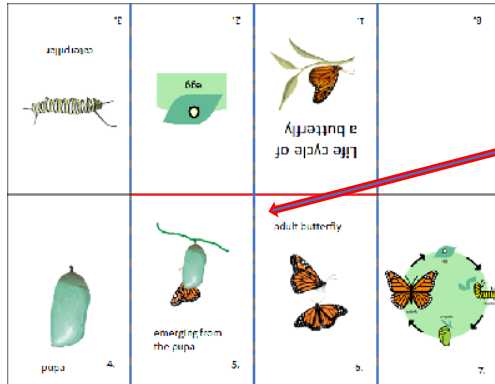

Draw or paste your own pictures on the template and follow the fold and cut directions. If you prefer, a group of booklets have already been made for you thanks to Judy Kuster and 22 graduate students at Minnesota State University. Just go to this site <http://www.mnsu.edu/comdis/kuster2/onecutbooks/onecutbooks.html> Thank you grad students.

Now let us put together a book. I made the Life Cycle of a Butterfly Book with Power Point and you are welcome to download it in its PDF version by going to <https://inspontaneousspeech.com/> for the free download. When printing it out, make sure the printer is set to print the full 8.5 x 11 inch page, without a border, so that each rectangle will make the same size page when folded. I printed it in landscape mode.

# How to make a One Cut Book

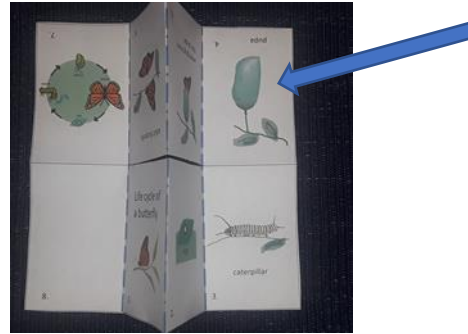

Cut red line

1. Fold the paper in half half on the dot dash line so that you can easily cut the red line with a scissors.

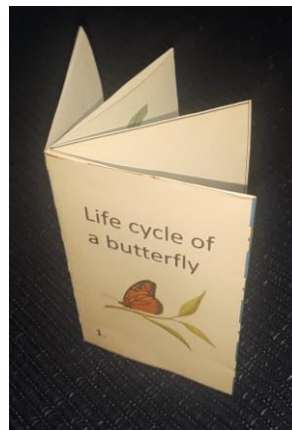

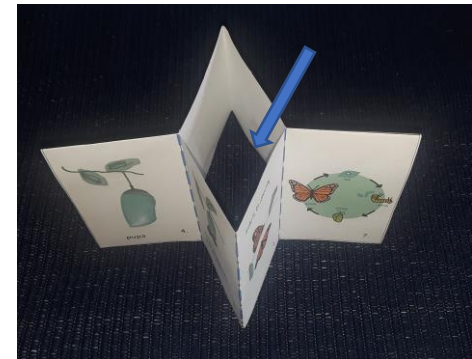

2. Fold the rest of the dash blue lines.

3. Fold this top section to the back.

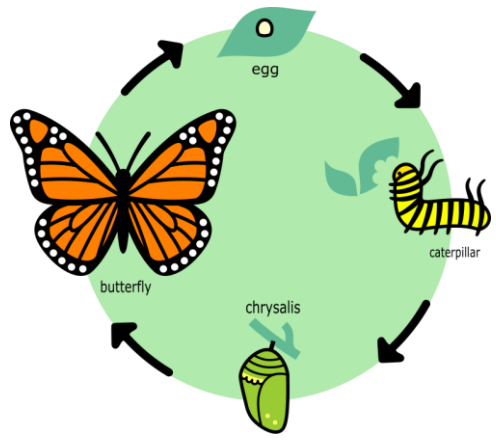

4. Push this together so pages will be formed. Pages will be double sided.

Your book should look like this

8.

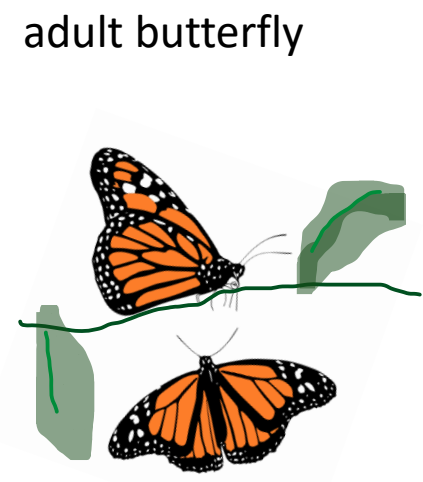

7.

1.

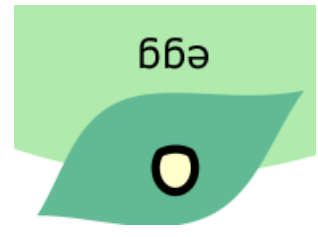

Life Cycle  
of a  
Butterfly

6.

adult butterfly

2.

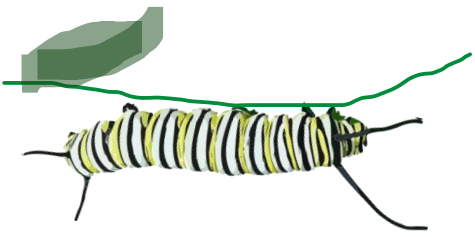

egg

5.

Adult emerges from the pupa

3.

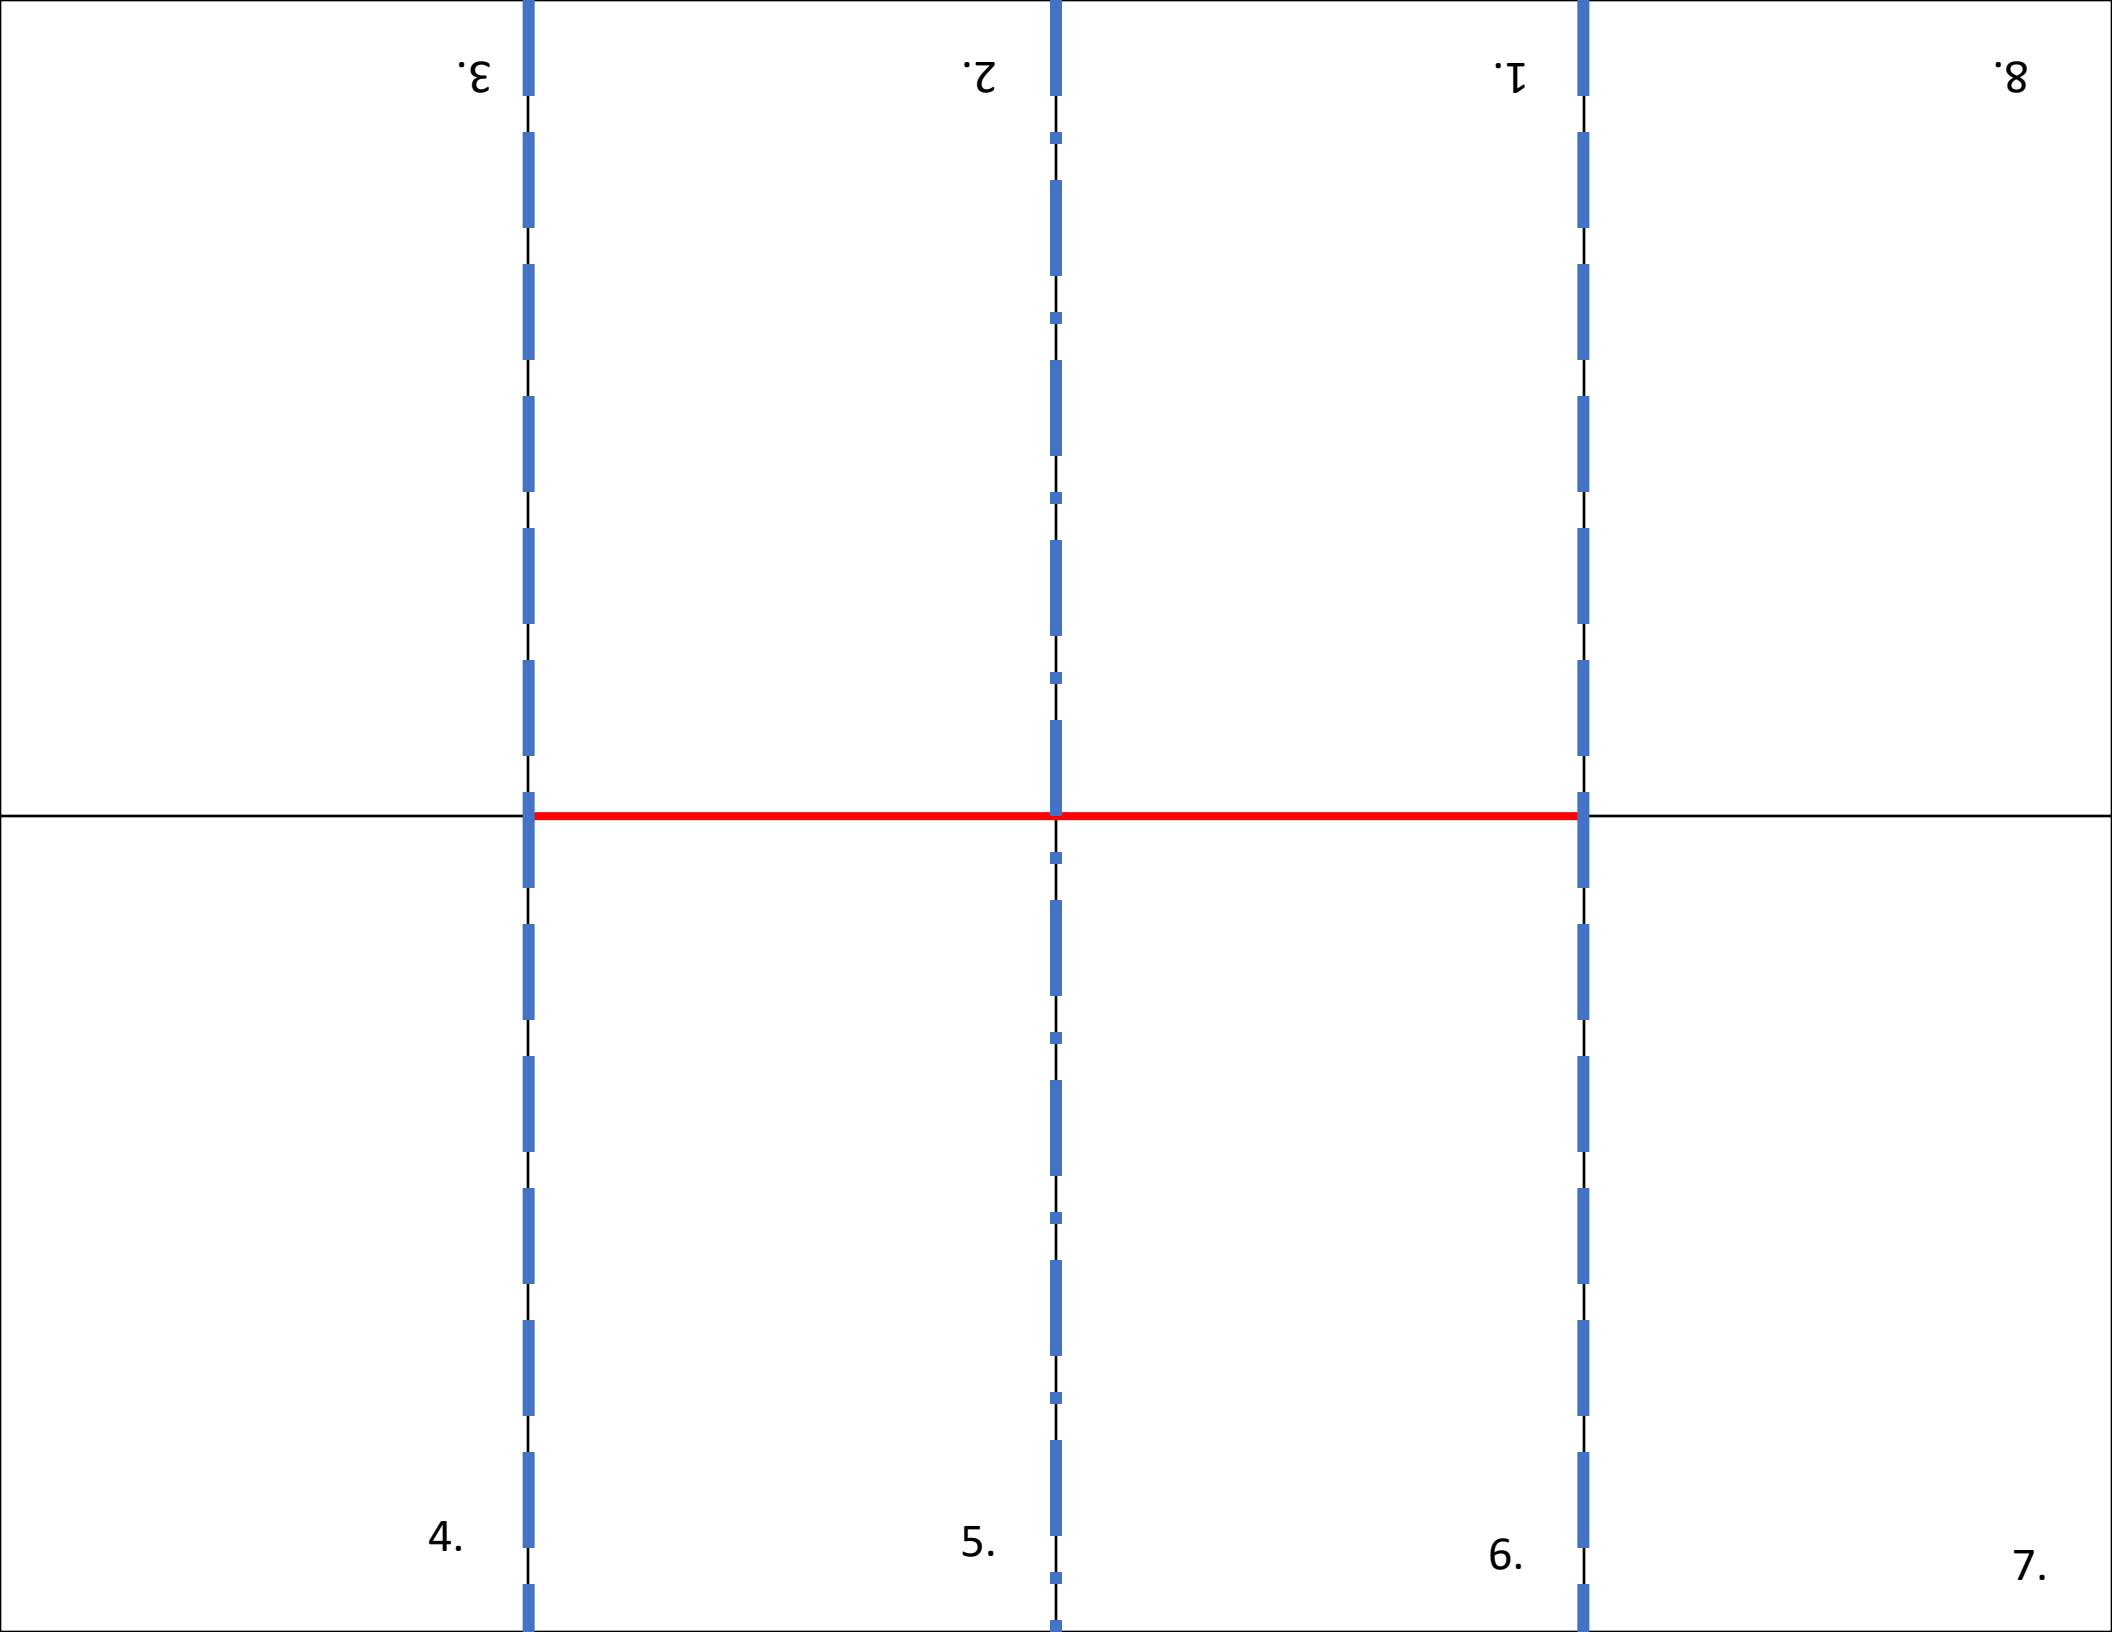

caterpillar

4.

pupa or chrysalis

8.

1.

2.
