

Directions for making paper birds

You will need the following materials:

- (1) 2 sheets of colored paper
- (2) a glue stick
- (3) scissors.
- (4) black marker to make eyes

Cut three paper strips: 1 ½ inches by 8 ½ inches. These will make the head, body and wings.

Roll one end of a paper strip to make a 1 ½ inch body. Glue it so it doesn't unroll.

Fold another paper strip to make a $\frac{1}{2}$ circle and glue down the end. This is the head.

Glue the head piece under neath the round body body piece. The long straight pieces form the tail.

Cut a small square off one end of the strip.
Fold it in half to make a small triangle for the
beak

Take the last strip and fold it accordion style to
make the wings.

Glue the wings along the birds back.
Glue the beak on the front. Use the
marker to make eyes.
